

Remarks

The applicant has presented the above election and amendments, as well as the following remarks, as a full response to the official communication. The applicant respectfully submits that the subject matter recited in new claims 26-29, of which claim 26 is recited in an independent format, is both readable upon the invention recited in presently elected claims 1-8 and supported in the specification.

With regards to independent claim 26, support for the recited subject matter can be found in the specification at least at:

Recited subject matter: “A server for delivering medical assistance to a traveler, the server being accessible by a traveler while traveling in a foreign country and operating a client device”.

Specification support at least at:

Para [0034]: “The system 100 may comprise a medical web server (MWS) 130”

Recited subject matter: “the server comprising: a communication module operative to communicate information illustrating a display of one or more selection buttons on a display of a client system, each selection button being associated with at least one type of medical assistance, the medical assistance being provisioned in at least two different languages and being associated with at least two countries”

Specification support at least at:

Para [0046]: “The medical web server 130 may include ... a server engine 260 that controls the operation and the communication of the medical web server 130.”

Para [0071]: “the MWS 130 sends an HTML file illustrating the “home page” of the medical web server 512”

Para [0061]: “The welcome page 402 can comprise a navigation section 412”

Para [0062]: “The navigation section 412 can comprise navigation buttons”

Para [0051]: “The description can be provided in two or more languages”

Para [0011]: “the multilingual medical web site can provide contact information to medical service providers in foreign countries”.

Recited subject matter: “a communication module operative to receive a selection of one of the selection buttons”

Specification support at least at:

Para [0047]: “The server engine 260 may receive HTTP requests, or similar requests”

Para [0062]: “Some of the navigation buttons may open a pull down list (sub menu) to allow additional selections by the client”.

Recited subject matter: “a web-page generating module for delivering the medical assistance associated with the selected button in the selected language and customized based on the selected country.”

Specification support at least at:

Para [0047]: “...used by the server engine 260 in order to generate the web page that matches the requested service and the current requester in order”

Para [0077]: “If the request is for additional information, the appropriate web page to convey the information is generated 532. To generate the web page, the appropriate MPFs 210a-c (FIG. 2) are selected ... The web page is then generated based on the selected MPFs 210a-c. The generated web page is sent to the client computer 534 and the method 500”.

With regards to claims 27-29, each is a dependent claim depending directly from independent claim 26 and reciting subject matter clearly supported in the specification.

Conclusion

The applicant submits that the currently pending claims, namely elected claims 1-8 and newly added claims 26-29, are directed toward common subject matter, i.e. the claims read upon a single invention. Further, the applicant stands forth that the subject matter recited in each claim is clearly supported in the specification. Accordingly, the applicant respectfully submits that the claims are in condition for consideration by the Office.

Respectfully submitted,

/Gregory Scott Smith/
